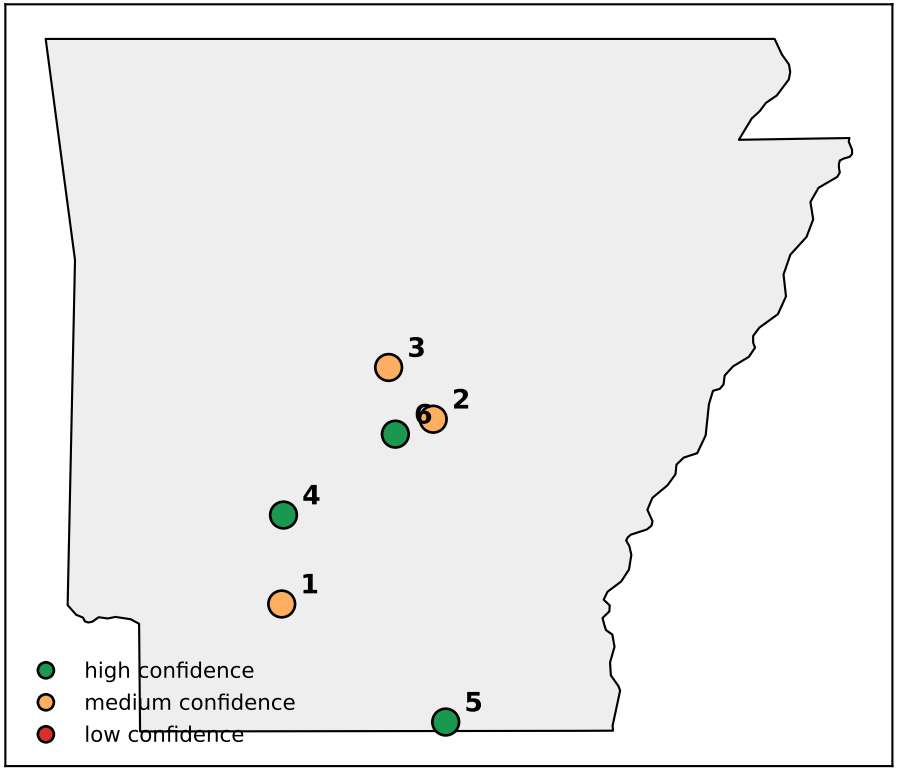
TNC Arkansas prescribed burns: satellite mapping test (blind; no perimeters used)



How to read these maps

- Each burn has a 3-page PDF: road map, aerial imagery, and satellite before/after with alternative outlines.
- Black outline = burned area mapped from satellite, starting from the recorded lat/long (star) and burn date.
- Colours inside = burn severity index (dNBR), not field-calibrated. Low values are expected under canopy.
- Mapped acres can differ from reported acres because patchy or light under-canopy fire is hard to see.
- Google Earth: open arkansas_burns.kmz. GIS: arkansas_burns.gpkg.

What would help most: your unit or burn perimeters, and notes on where the maps are right or wrong.

#	Preserve - unit	Date	Reported ac	Mapped ac	% of reported	Low/very low ac	Mod-high ac	1st clear img (d)	Confidence
1	AR Oak NA - West unit	2026-01-06	120	42	35%	40	1	1	medium
2	Lorance Creek NA-Preserve - North	2026-01-15	90	41	45%	36	4	3	medium
3	Rattlesnake Ridge NA - Maumelle Pinnacl	2026-03-20	135	65	48%	65	0	2	medium
