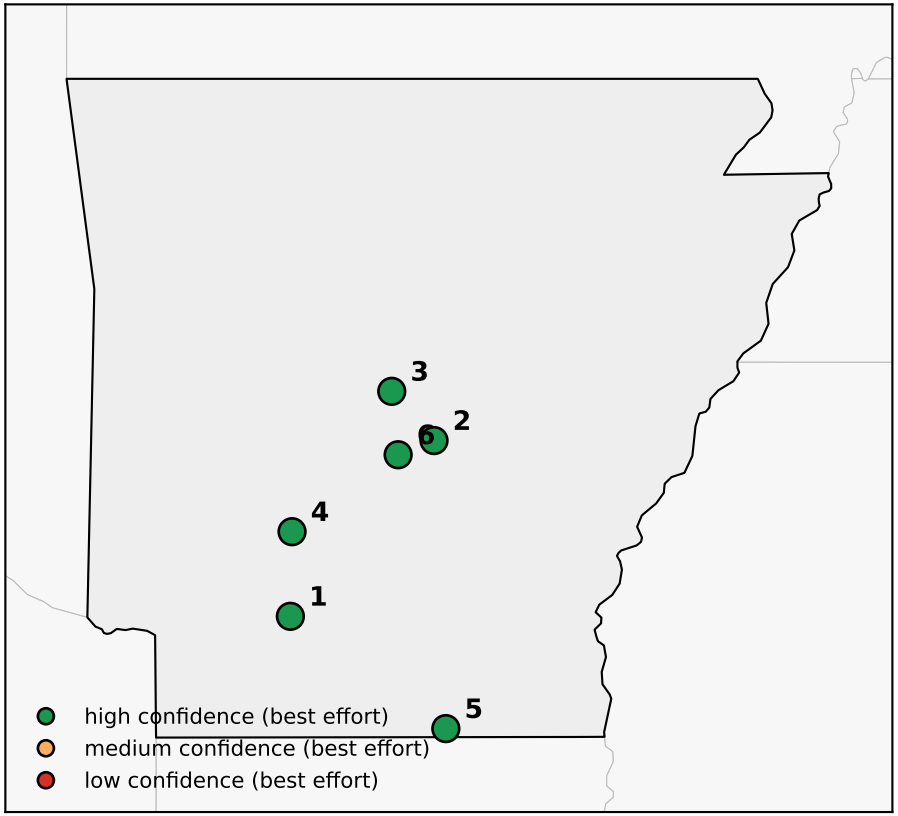
Arkansas prescribed burns (all-things + stand embeddings): satellite burn maps (no perimeters u



How to read these maps

- Each burn has a 5-page PDF (also as PNGs):
  1 Landsat before/after, 2 Sentinel-2 before/after,
  3 Sentinel-2 + Landsat combined, 4 VIIRS active fire,
  5 best effort (adds embeddings) with burn severity.
- Every map starts from the recorded lat/long (star) and
  burn date; no burn perimeters were used.
- Reported acres are rough estimates (used only to set the
  search window); confidence reflects imagery timing and
  signal strength, not agreement with reported acres.
- Google Earth: open burns.kmz. GIS: burns.gpkg.
- summary.csv has every number in this table and more.

What would help most: your unit or burn perimeters, and
notes on where the maps are right or wrong.
